Elden Ring is a fantasy action RPG developed by the company WayForward. In this game, players will take the role of an unsung hero, a hero who was never destined for greatness. You will try to rise to be an Elden Lord by cultivating the power of the mythical Elden Ring and uncovering the deepest mystery of the Lands Between. May the new fantasy action RPG lie with you. KEY FEATURES · Unique Online Play that Loosely Connects You to Others – An asynchronous online element where you can play online with other people and travel together. It's a novel online play method that allows players to feel the presence of the other players. · An Epic Drama Based on a Myth – A multilayered story told in fragments. A tale about the end of an era that has recently been entrusted to a new hero. · An Experiencing of Epic and Ambiguous Feelings from Out of This World – The epic drama is carried out in the form of a story where much of the action unfolds in an extremely limited time. · Open Field and Dungeons with Massive Design – Through exploration, you can safely travel to faraway places with huge dungeons and open fields. You can freely explore the various situations as you want. · A Unique NPC Model – A customer service NPC with a novel appearance will appear in the same world as you. You can make friends by helping them out. · A Variety of Action and Adventure in Untold Consequences – Solving puzzles, talking to NPCs and meeting characters. You can deepen your understanding of the Lands Between by exploring, solving and talking to the various people you meet. · The Completion of Your Story With Various Paths – You can select the main path in the beginning. You can continue your story by changing the path along the way. · Skill Based System where you can freely develop your character – In addition to giving you a variety of different character types, the game also supports a skill based system allowing you to develop your character according to your play style. Q: How to create a dropdown where, if you click the submit button, the values in the selected object are passed to the server? So I have a dropdown that needs to work like this: User selects a phone, then the submit button is clicked. The data is submitted to the server with POST

Golden Sun: A New Beginning - Tarnished Prince - Triple-R Sword - Lost in the Woods - My first experience with After Dark (disclosure: I did not play the Japanese version) is all about the opening. Suddenly a beautiful, sweeping orchestral score surges into the background. Nothing is in focus, the camera wobbles and spins, but that music is so fantastic that I don't feel a thing. As I become more familiar with the game's set up, the camera work changes, the wobbly is replaced with a smooth, pulsating effect, and I am soon in control of Agate. The moment I leave the tavern I realize that the game is quite different from anything I have played before. Seamlessly moving between real life and fantasy Agate has the ability to enter portals of dreams when he reaches puberty. These portals can be accessed at any time if he receives the proper vision. Because of his new powers Agate is cast out of the Lightwood, a place of safety and knowledge, where he used to live with his mother and sister. The beautiful, untamed lands of the newly proclaimed Drowned Kingdom are full of danger and hardship. With the help of a confidant and a group of other misfits he travels the Kingdom and its surrounding villages and discovers his destiny. Agate's a true outsider, a bitter, ex-mercenary that despises the Lightwoods for dragging him away from the safety and comfort of home. He's also a swordsman, a capable one at that, and that alone would be enough for me. I play Final Fantasy Tactics when I get really attached to a character. Agate is so much more! You have a dialogue wheel at the bottom of the screen that allows you to cast your own spells and to send out a message to others. If you cast an ice spell, it will hurt the enemies hands and feet, sending them running for their lives.

What's new:

1. Single Player Mode

In this mode, you can create and forge your own unique hero. The game allows you to change the races, classes, gender, appearance and equipment as you wish.

Your experience is accumulated as you decide what to do. When you complete the main story, the plot continues in side-quests.

2. Campaign Mode

In Campaign Mode, you will be brought to various locations to battle real-time battles against all types of enemies with different backgrounds, such as elves and goblins.

In Final Fantasy XIV Online, your time spent as an avatar evolves through various scenarios, raising the strength of your character and allowing you to unlock new content.

Side quests that strengthen your character rank increase. And repeated challenges await your victorious return to your familiar realm.

3. Battle.

Livestream style combat.

Using skills, status effects and special items, you can engage battles where the enemies can attack from all sides.

Successfully complete these battles to level up!

This is far from perfect but it works as a nice temporary fix until this patch is released. I've removed the ravenous lions (yes i have all eight of them + all the beasts in yaru's den) and replaced them with tigers for now. The lions are not affected either which is why I moved them back to where they were with the beasts.

Hello everyone, I just want to say that I'm looking over the combat with the new skills and the effect they were having on

towers and disables and I've found a pretty big issue. If I connected to a tower on the first day, my damage over time effects didn't go away. The combat log will not have this info, but gameplay will. -Kacem

Will log a bug report for that...also, it may work as intended, as most of those towers don't stand around long after the first few waves of attacks if you do string attacks for long enough...example: I was trying to get an armorsmithing and kins

Remember to subscribe, share and comment!Q: Accessing control from another form I have two forms: Form1 Form2 I want a Form2 controls being editable in Form1. I have tried binding the control, but not sure how to make the control editable in form1. A: While you could expose a Form1 property to form2 (for instance by passing the form1 as a parameter to form2), I'd recommend binding a form2 field to a property in form1 instead. Setting this form2 field's value from the form1 would be as simple as `form2.myControl.text = form1.myControlText` Other ways of accessing controls on form2 from form1 are making form2 static and then using `MyForm2.myControl` (check that MyForm1 is your form1's class name) passing the form2 instance to your form1 as a parameter A: One way to access form2 from form1 would be to make form2 static, and then access it by `MyForm2.myControl`. In Form1 add this code: `Public Property MyForm2 As Form2 Get Return My.Form2 End Get Set My.Form2 = Value End Set End Property` In Form1 modify the code to: `Public Property MyForm2 As Form2 Set(value As Form2) My.Form2 = value End Set End Property` Then in Form2
