I have a DataTable (or a DataView), and in that DataTable, I want to display columns from a different table. I would also like to display a UITextView (or UIButton) for each row. How can I accomplish this dynamically? A: Essentially you are trying to create a custom collection view. Here are the steps you have to do: Create UITableView Add

---

all the information (UITextViews, UITabBarItems) you want Create a custom UITableViewCell subclass and implement the datasource delegate methods. You can then change the content of each cell using the datasource methods Create and add the custom cell to the table view Autoimmune cystitis: an unrecognized cause of female lower urinary tract symptoms. A 30-year-old female presented with lower urinary tract symptoms that failed to respond to conservative therapy. Cy
