What's New In?

ShowXpress allows you to turn your computer into a lighting console by controlling multiple light devices. It can help you create a scene and configure the DMX lighting fixture in order to prepare for the show. You can create multiple profiles that can be loaded and triggered with just one mouse click. It can play multiple scenes at the same time in order to create impressive light effects. Note: The application is free to use but it is dedicated to the interfaces provided by CHAUVET. Screenshots: CHAUVET offers a series of profiles to design the lighting devices. Each profile is divided into several pages, including the light devices, scene, history and utility tabs. Each page allows you to navigate between the different scenes and the light devices that you can manage. ShowXpress Features: - Allows you to control and automate lighting fixtures with CHAUVET interfaces. - You can create multiple profiles that can be loaded and triggered with just one mouse click. - You can play multiple scenes at the same time in order to create impressive light effects. - It can play multiple scenes in one page at the same time. - You can edit any lighting fixture in any page. ShowXpress does not include CHAUVET interfaces. You must have a CHAUVET installation. You can also order it as a complete solution from the official website of CHAUVET : www.chauvet.net If you are looking for a specific lighting control software, please use one of the following links: About ShowXpress : ShowXpress allows you to turn your computer into a lighting console by controlling multiple light devices.
